

MESH-POWER™

Reshaping
your
world.

POWERFUL DUST EXTRACTION

FOR A BREATH OF FRESH AIR

The new Norton MeshPower discs are fully ceramic products designed for both raw wood sanding as well as between coat abrasion. The robust product design allows the MeshPower disc to sand for extended periods of time while delivering super-fast cut and an extremely fine scratch pattern.

The discs can be used on a variety of equipment including: random orbital sanders, multi-head rotary attachments and 16" buffers under a driver pad such as our Norton Very Fine Dark Maroon Pad.

The fully mesh backing design offers superior dust extraction and is ideal where you want an aggressive cutting action but really fine scratch pattern. The built-in hook and loop backing makes attaching the discs to the driver plates quick and easy.

<https://nortonsga.us/meshpowerfloor>

- Mesh backing for optimum dust extraction
- Full ceramic grain for excellent cut rates and superior scratch pattern
- Hook and loop design ideal for random orbital sanders as well as multi-head equipment and standard rotary buffers
- Product design delivers extensive product life
